Secondly, it was created to serve as a quick and easy directory that alphabetically groups most of the common herbs in one place.

The real ones are called Ferrero Rocher.

Interleukins, aldesleukin, filgrastim, sargramostim, rituximab, BCG, tretinoin, irinotecan, betamethasone.

Auditors are not infallible and do make mistakes, but as long as there is sufficient evidence to change or remove an observation, the auditor would accept this.

A gout diet isn't used to directly treat gout but to prevent flare-ups of gout.
